

## A diverse world needs a fund to match. Principal Global Diversified Income Fund.

This multi-manager, multi-discipline fund (PGBAX) puts the world at your fingertips. By combining domestic and international opportunities, it aims for high current income with added capital appreciation potential – in a variety of market conditions. Utilizing both fixed-income and equity investments, this

fund delivers the diversification your clients need in today's market. It's a unique offering that takes advantage of our global asset management capabilities. And we believe that's a good match by any measure.

WE'LL GIVE YOU AN EDGE®

*Investors should carefully consider a fund's investment objectives, risks, charges and expenses prior to investing. A prospectus containing this and other information can be obtained by contacting a financial professional, visiting [principalfunds.com](http://principalfunds.com), or by calling 800-222-5852. Read the prospectus carefully before investing.*

*A mutual fund's share price and investment return will vary with market conditions, and the principal value of an investment when you sell your shares may be more or less than the original cost.*

*Fixed-income investment options are subject to interest rate risk, and their value will decline as interest rates rise. Neither the principal of bond investment options nor their yields are guaranteed by the U.S. or any other government entity. Investments concentrated in natural resources industries can be affected significantly by events relating to those industries, such as variations in the commodities markets, weather, disease, embargoes, international, political and economic developments, the success of exploration projects, tax and other government regulations, and other factors. Investing in derivatives entails specific risks relating to liquidity, leverage and credit that may reduce returns and/or increase volatility. REIT securities are subject to risk factors associated with the real estate industry and tax factors of REIT registration. An MLP that invests in a particular industry (e.g., oil and gas) may be harmed by detrimental economic events within that industry. As partnerships, MLPs may be subject to less regulation (and less protection for investors) under state laws than corporations. In addition, MLPs may be subject to state taxation in certain jurisdictions, which may reduce the amount of income paid by an MLP to its investors. Asset allocation/diversification does not guarantee a profit or protect against a loss.*
