Semiannual Report

February 28, 2017

Rev. 01/2017

FACTS

WHAT DOES PRINCIPAL FUNDS, INC. DO WITH YOUR PERSONAL INFORMATION?

Whv?

Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What?

The types of personal information we collect and share depend on the product or service you have with us. This information can include:

- · Social Security number and income
- · Assets and transaction history
- · Account transactions and account balances

When you are no longer our customer, we continue to share your information as described in this notice

How?

All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Principal Funds, Inc. chooses to share; and whether you can limit this sharing.

REASONS WE CAN SHARE YOUR PERSONAL INFORMATION	DOES PRINCIPAL FUNDS, INC. SHARE?	CAN YOU LIMIT THIS SHARING?
For our everyday business purposes—such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus	Yes	No
For our marketing purposes—to offer our products and services to you	Yes	No
For joint marketing with other financial companies	No	We don't share
For our affiliates' everyday business purposes—information about your transactions and experiences	Yes	No
For our affiliates' everyday business purposes—information about your creditworthiness	No	We don't share
For nonaffiliates to market to you	No	We don't share

Questions?

Call 1-800-222-5852 or go to www.principalfunds.com/customer-support/contact-us

Page 2

Who we are	
Who is providing this notice?	Principal Funds, Inc. and Principal Funds Distributor, Inc.
What we do	
How does Principal Funds, Inc. protect my personal information?	To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings.
How does Principal Funds, Inc. collect my personal information?	 We collect your personal information, for example, when you Open an account or seek advice about your investments Direct us to buy securities or make deposits, or withdrawals from your account Give us your contact information or show your government issued ID We also collect your personal information from others, such as affiliates, or other companies.
Why can't I limit all sharing?	 Federal law gives you the right to limit only sharing for affiliates' everyday business purposes—information about your creditworthiness affiliates from using your information to market to you sharing for nonaffiliates to market to you State laws and individual companies may give you additional rights to limit sharing.
Definitions	
Affiliates	Companies related by common ownership or control. They can be financial and nonfinancial companies. • Our affiliates include companies of Principal Financial Group
Nonaffiliates	Companies not related by common ownership or control. They can be financial and nonfinancial companies. • Principal Funds, Inc. does not share with nonaffiliates so they can market to you.
Joint marketing	A formal agreement between nonaffiliated financial companies that together market financial products or services to you. • Principal Funds, Inc. doesn't jointly market.
Other important information

1. Organization

Principal Funds, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company and operates as a series fund in the mutual fund industry. The financial statements for Blue Chip Fund, Bond Market Index Fund, Diversified Real Asset Fund, Dynamic High Yield Explorer Fund, EDGE MidCap Fund, Global Multi-Strategy Fund, Global Opportunities Equity Hedged Fund, Global Opportunities Fund, International Equity Index Fund, International Small Company Fund, Multi-Manager Equity Long/Short Fund, Opportunistic Municipal Fund, Origin Emerging Markets Fund, Preferred Securities Fund, Real Estate Allocation Fund, Real Estate Debt Income Fund, Small-MidCap Dividend Income Fund, SystematEx International Fund and SystematEx Large Value Fund (known as the "Funds") are presented herein. The Funds may offer up to eleven classes of shares: Class A, Class C, Class J, Class P, Institutional, R-1, R-2, R-3, R-4, R-5 and R-6 classes of shares. Certain detailed financial information for Class A, Class C and Class P shares is provided separately.

Each of the Funds is an investment company and applies specialized accounting and reporting under Accounting Standards Codification Topic 946, *Financial Services - Investment Companies*. Each of the Funds was an investment company at all times during the period. The Funds have not provided financial support, and are not contractually required to provide financial support to any investee.

Effective September 22, 2015, the initial purchases of \$2,500,000 of Class A shares, Class P shares and Institutional shares of Global Opportunities Equity Hedged Fund were made by Principal Financial Services, Inc.

Effective September 22, 2015, the initial purchases of \$4,000,000 and \$3,500,000 of Institutional shares and R-6 shares, respectively, of SystematEx International Fund were made by Principal Financial Services, Inc.

Effective September 22, 2015, the initial purchase of \$7,500,000 of R-6 shares of SystematEx Large Value Fund was made by Principal Financial Services, Inc.

Effective September 28, 2015, the initial purchase of \$10,000 of Institutional shares of Edge MidCap Fund was made by Principal Management Corporation (the "Manager").

Effective March 29, 2016, the initial purchases of \$10,000 of R-3, R-4 and R-5 shares of Blue Chip Fund and Diversified Real Asset Fund were made by the Manager.

Effective March 29, 2016, the initial purchase of \$10,000 of Class P shares of Origin Emerging Markets Fund was made by the Manager.

Effective March 31, 2016, the initial purchases of \$10,000 of Class A, Class P, Institutional and R-6 shares of Multi-Manager Equity Long/Short Fund were made by the Manager.

Effective October 30, 2016, Credit Opportunities Explorer Fund liquidated its net assets and proceeds were sent to shareholders.

Effective January 3, 2017, the initial purchases of \$10,000 of R-6 shares of Blue Chip Fund, EDGE MidCap Fund, International Equity Index Fund, International Small Company Fund, Preferred Securities Fund, Real Estate Debt Income Fund, and Small-MidCap Dividend Income Fund were made by the Manager.

All classes of shares for each of the Funds represent interests in the same portfolio of investments, and will vote together as a single class except where otherwise required by law or as determined by the Fund's Board of Directors. In addition, the Board of Directors declares separate dividends on each class of shares.

2. Significant Accounting Policies

The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The following summarizes the significant accounting policies of the Funds:

Security Valuation. Real Estate Allocation Fund invests in Institutional Class shares of other series of Principal Funds, Inc. (the "Underlying Funds"). Investments in the Underlying Funds are valued at the closing net asset value per share of each Underlying Fund on the day of valuation.

2. Significant Accounting Policies (Continued)

The Funds (with the exception of Real Estate Allocation Fund) value securities for which market quotations are readily available at fair value, which is determined using the last reported sale price. If no sales are reported, as is regularly the case for some securities traded over-the-counter, securities are valued using the last reported bid price or an evaluated bid price provided by a pricing service. Pricing services use modeling techniques that incorporate security characteristics such as current quotations by broker/dealers, coupon, maturity, quality, type of issue, trading characteristics, other yield and risk factors, and other market conditions to determine an evaluated bid price or, in the case of certain credit default swaps, a mean price provided by a pricing service. When reliable market quotations are not considered to be readily available, which may be the case, for example, with respect to restricted securities, certain debt securities, preferred stocks, and foreign securities, the investments are valued at their fair value as determined in good faith by the Manager under procedures established and periodically reviewed by the Fund's Board of Directors.

The value of foreign securities used in computing the net asset value per share is generally determined as of the close of the foreign exchange where the security is principally traded. Events that occur after the close of the applicable foreign market or exchange but prior to the calculation of the Funds' net asset values are reflected in the Funds' net asset values and these securities are valued at fair value as determined in good faith by the Manager under procedures established and periodically reviewed by the Fund's Board of Directors. Many factors, provided by independent pricing services, are reviewed in the course of making a good faith determination of a security's fair value, including, but not limited to, price movements in ADRs, futures contracts, industry indices, general indices, and foreign currencies.

To the extent the Funds invest in foreign securities listed on foreign exchanges which trade on days on which the Funds do not determine net asset values, for example weekends and other customary national U.S. holidays, the Funds' net asset values could be significantly affected on days when shareholders cannot purchase or redeem shares.

Certain securities issued by companies in emerging market countries may have more than one quoted valuation at any given point in time, sometimes referred to as a "local" price and a "premium" price. The premium price is often a negotiated price, which may not consistently represent a price at which a specific transaction can be effected. It is the policy of the Funds to value such securities at prices at which it is expected those shares may be sold, and the Manager or any sub-advisor is authorized to make such determinations subject to such oversight by the Fund's Board of Directors as may occasionally be necessary.

Currency Translation. Foreign holdings are translated to U.S. dollars using the exchange rate at the daily close of the New York Stock Exchange. The identified cost of the Funds' holdings is translated at approximate rates prevailing when acquired. Income and expense amounts are translated at approximate rates prevailing when received or paid, with daily accruals of such amounts reported at approximate rates prevailing at the date of valuation. Since the carrying amount of the foreign securities is determined based on the exchange rate and market values at the close of the period, it is not practicable to isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of securities during the period.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between trade and settlement dates on security transactions, and the difference between the amount of dividends and foreign withholding taxes recorded on the books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized appreciation (depreciation) on translation of assets and liabilities in foreign currencies arise from changes in the exchange rate relating to assets and liabilities, other than investments in securities, purchased and held in non-U.S. denominated currencies.

The following funds held securities denominated in foreign currencies that exceeded 5% of net assets of the fund:

Global Opportunities Equity Hedged Fund		Global Opportunition	es Fund	Internation <u>Equity Index I</u>		International Small Company Fund		
British Pound	9.0%	British Pound	9.2%	Euro	29.5%	Japanese Yen	28.8%

		New Taiwan Dollar	10.5	Japanese Yen	25.0			
		South Korean Won	5.4	British Pound	15.2			
				Swiss Franc	8.9			
				Australian Dollar	6.6			

2. Significant Accounting Policies (Continued)

Income and Investment Transactions. The Funds record investment transactions on a trade date basis. Trade date for senior floating rate interests purchased in the primary market is considered the date on which the loan allocations are determined. Trade date for senior floating rate interests purchased in the secondary market is the date on which the transaction is entered into. The identified cost basis has been used in determining the net realized gain or loss from investment transactions and unrealized appreciation or depreciation of investments. The Funds record dividend income on the ex-dividend date, except dividend income from foreign securities whereby the ex-dividend date has passed; such dividends are recorded as soon as the Funds are informed of the ex-dividend date. Interest income is recognized on an accrual basis. Discounts and premiums on securities are accreted/amortized, respectively, on the level yield method over the lives of the respective securities. The Funds allocate daily all income and realized and unrealized gains or losses to each class of shares based upon the relative proportion of the value of shares outstanding of each class.

Expenses. Expenses directly attributed to a particular fund are charged to that fund. Other expenses not directly attributed to a particular fund are apportioned among the registered investment companies managed by the Manager.

Management fees are allocated daily to each class of shares based upon the relative proportion of the value of shares outstanding of each class. Expenses specifically attributable to a particular class are charged directly to such class and are included separately in the statements of operations.

In addition to the expenses that the Real Estate Allocation Fund bears directly, the Real Estate Allocation Fund indirectly bears a pro rata share of the fees and expenses of the Underlying Funds in which it invests. Expenses included in the statement of operations of Real Estate Allocation Fund reflect the expenses of Real Estate Allocation Fund and do not include any expenses associated with the Underlying Funds.

Distributions to Shareholders. With respect to Opportunistic Municipal Fund, net investment income is declared as dividends daily to settled shares of record as of that day, and all distributions of realized gains from investment transactions are recorded on the exdividend date. Dividends and distributions to shareholders of the other Funds are recorded on the exdividend date. Dividends and distributions to shareholders from net investment income and net realized gain from investments and foreign currency transactions are determined in accordance with federal tax regulations, which may differ from U.S. GAAP. These differences are primarily due to differing treatments for net operating losses, foreign currency transactions, options and futures contracts, certain defaulted securities, sales of Passive Foreign Investment Companies, losses deferred due to wash sales, tax straddles, mortgage-backed securities, certain preferred securities, swap agreements, short sales, partnership investments, REITs, utilization of earnings and profits distributed to shareholders on redemption of shares, and limitations imposed by Sections 381-384 of the Internal Revenue Code. Permanent book and tax basis differences are reclassified within the capital accounts based on federal tax-basis treatment; temporary differences do not require reclassification. To the extent dividends and distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as return of capital distributions.

Federal Income Taxes. No provision for federal income taxes is considered necessary because each of the Funds intends to qualify as a "regulated investment company" under the Internal Revenue Code and intends to distribute each year substantially all of its net investment income and realized capital gains to shareholders.

Management evaluates tax positions taken or expected to be taken in the course of preparing the Funds' tax returns to determine whether it is "more likely than not" that each tax position would be sustained upon examination by a taxing authority based on the technical merits of the position. Tax positions not deemed to meet the more likely than not threshold would be recorded as a tax benefit or expense in the current year. During the period ended February 28, 2017, the Funds did not record any such tax benefit or expense in the accompanying financial statements. The statute of limitations remains open for the, shorter of the fiscal years from 2013-2015 or commencement of the fund's operations to 2015. No examinations are in progress at this time.

Foreign Taxes. Certain of the Funds are subject to foreign income taxes imposed by certain countries in which they invest. Foreign income taxes are accrued by the Funds as a reduction of income. These amounts are shown as withholding tax on foreign dividends on the statements of operations. In consideration of recent decisions rendered by European courts, certain of the Funds have filed additional tax reclaims for taxes withheld in prior years. Due to the uncertainty and timing of these reclaims, a corresponding receivable will only be recorded when both the amount is known and there are no significant uncertainties regarding collectability.

2. Significant Accounting Policies (Continued)

Basis for Consolidation. Diversified Real Asset Fund (the "Consolidated Fund") may invest up to 25% of its total assets in its wholly-owned subsidiary DRA Cayman Corporation (a "Cayman Subsidiary") organized under the laws of the Cayman Islands. Diversified Real Asset Fund is the sole shareholder of the Cayman Subsidiary, and shares of the Cayman Subsidiary will not be sold or offered to other investors. To the extent that Diversified Real Asset Fund invests in its Cayman Subsidiary, it will be subject to the particular risks associated with the Cayman Subsidiary's investments, which are discussed in the applicable Prospectus and SAI. The principal purpose of investing in the Cayman Subsidiary is to allow Diversified Real Asset Fund to gain exposure to the commodity markets within the limitations of federal tax laws applicable to regulated investment companies. Diversified Real Asset Fund's investment portfolio has been consolidated and includes the portfolio holdings of Diversified Real Asset Fund and its Cayman Subsidiary. The consolidated financial statements include the accounts of Diversified Real Asset Fund and its Cayman Subsidiary. All intercompany transactions and balances have been eliminated in consolidation. At February 28, 2017, the net assets of the Cayman Subsidiary were \$347,869,000 or 9.4% of the Consolidated Fund's net assets.

Investment Company Reporting Modernization. Effective October 13, 2016, the U.S. Securities and Exchange Commission ("SEC") approved a final rule, *Investment Company Reporting Modernization*. The SEC adopted new rules and forms as well as amendments to its rules and forms to modernize the reporting and disclosure of information by registered investment companies. The new rules and forms will be effective beginning in 2017. At this time, management is evaluating the implications of these changes on the financial statements.

3. Operating Policies

Borrowings. Pursuant to an exemptive order issued by the Securities and Exchange Commission, the Funds and other registered investment companies managed by the Manager may participate in an interfund lending facility ("Facility"). The Facility allows the Funds to borrow money from or loan money to the other participants. Loans under the Facility are made to handle unusual and/or unanticipated short-term cash requirements. Interest paid and received on borrowings is the average of the current repurchase agreement rate and the bank loan rate (the higher of (i) the Federal Funds Rate or (ii) the One Month LIBOR rate plus 1.00%). Bond Market Index Fund, Diversified Real Asset Fund, EDGE MidCap Fund, Global Multi-Strategy Fund, Global Opportunities Fund, International Equity Index Fund, Origin Emerging Markets Fund, Preferred Securities Fund, and Small-MidCap Dividend Income Fund each loaned to the Facility. The interest income received is included in interest income on the statements of operations.

During the period ended February 28, 2017, funds borrowing from the Facility were as follows (amounts in thousands):

	Average Outstanding Balance	Weighted Average Annual Interest Rate
Blue Chip Fund	\$1,279	1.09%
Global Opportunities Fund	962	1.04
International Equity Index Fund	535	1.17
International Small Company Fund	1	.93
Opportunistic Municipal Fund	302	1.16
Origin Emerging Markets Fund	739	1.17
Preferred Securities Fund	2,945	1.15
SystematEx International Fund	41	1.04
SystematEx Large Value Fund	6	1.15

The interest expense associated with these borrowings is included in other expenses on the statements of operations.

In addition, certain of the Funds participate with other registered investment companies managed by the Manager in an unsecured joint line of credit with a bank which allows the participants to borrow up to \$75 million, collectively. Borrowings are made solely to facilitate the handling of unusual and/or unanticipated short-term cash requirements. Interest is charged to each participant, based on its borrowings, at a rate equal to the higher of the Federal Funds Rate or the One Month LIBOR rate plus 1.00%. Additionally, a commitment fee is charged at an annual rate of .15% on the amount of the line of credit. During the period ended February 28, 2017, Origin Emerging Markets Fund borrowed against the line of credit. The average outstanding balance for the liability during the period ended February 28, 2017 was \$5,000 at a weighted average annual interest rate of 1.68%. The interest expense associated with these borrowings is included in other expenses on the statements of operations.

Commodity Linked Notes. Diversified Real Asset Fund invests in structured notes whose market values are primarily derived from changes in the value of various commodity indices and other factors. Valuations on these securities may be volatile as the payment features on certain notes may contain attributes that multiply the effects of changes in the values of the underlying indices. Structured notes may entail a greater degree of market risk than other types of debt securities. Structured notes may also be more volatile, less liquid, and more difficult to accurately price than less complex securities or more traditional debt securities. Fluctuations in the fair value of the structured notes are recorded as unrealized gains and losses in the accompanying financial statements. Interest income is accrued daily. These notes are subject to prepayment, credit, and interest rate risks. At maturity, or when a note is sold, the fund records a realized gain or loss.

Counterparties. The Funds may be exposed to counterparty risk, or the risk that another party with which the Funds have unsettled or open transactions will fail to perform on their commitment. To the extent that unpaid amounts owed to the Funds exceed a predetermined threshold agreed to with the counterparty, such counterparty shall advance collateral to the Funds in the form of cash or cash equivalents equal in value to the unpaid amount owed to the Funds. If the unpaid amount owed to the Funds subsequently decreases, the Funds would be required to return all or a portion of the collateral.

Master Netting Agreements may also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under the Master Netting Agreements, collateral is routinely transferred if the total net exposure to certain transactions governed under the relevant master netting agreement with a counterparty exceeds a specified threshold.

Diversified Real Asset Fund, Global Multi-Strategy Fund and Multi-Manager Equity Long/Short Fund have financial instruments that are subject to Master Netting Agreements or similar agreements.

As of February 28, 2017, financial assets and liabilities subject to Master Netting Agreements or similar agreements were as follows (amounts in thousands):

Collateral information relating to securities on loan is included in the securities lending note to financial statements.

The financial instruments that are subject to Master Netting Agreements or similar agreements may include right of setoff provisions. Derivative instruments include provisions to setoff positions covered under the agreements with the same counterparties and provisions to setoff positions outside of the agreements with the same counterparties in the event of default by one of the parties. Derivative instruments also include collateral provisions. Collateral received and pledged are generally settled daily with each counterparty.

Deposits with Counterparty. Cash pledged as collateral is reflected as an asset on the statement of assets and liabilities as deposits with counterparty. There are a variety of security types which require varying levels of pledged collateral. Customer account agreements govern cleared derivatives transactions such as futures contracts and certain swap agreements. Such transactions require posting of initial margin as determined by each relevant clearing agency which is segregated in an account at a futures commission merchant ("FCM") registered with the Commodity Futures Trading Commission. International Swaps and Derivatives Association ("ISDA") accounts are maintained in a segregated account at the custodian for OTC Derivatives. Master Securities Forward Transaction Agreements ("MSFTA") accounts are also maintained in a segregated account at the custodian for collateral related to forward currency contracts and TBA securities. Certain funds may pledge cash to a broker for securities sold short and repurchase agreements.

For the period ended February 28, 2017, deposits with counterparty were as follows (amounts in thousands):

	Repurchase Agreements	FCM (Futures and Cleared <u>Swaps)</u>	<u>Shorts</u>	MSFTA (Forward Currency Contracts and TBA Securities)	ISDA (OTC <u>Derivatives)</u>

Floating Rate Notes Issued in Conjunction with Securities Held. Opportunistic Municipal Fund has entered into transactions in which a fund transfers fixed rate bonds to trusts in exchange for cash and residual interests in the trusts' assets and cash flows, which are in the form of inverse floating rate securities. The trusts finance the purchases of the fixed rate bonds by issuing floating rate notes to third parties. The fund enters into shortfall and forbearance agreements with the trusts, which commit the fund to pay the trusts, in certain circumstances, the difference between the liquidation value of the fixed rate bonds held by the trusts and the liquidation value of the floating rate notes held by third parties, as well as any shortfalls in interest cash flows. The residual interests held by the fund (inverse floating rate securities) include the right of the fund (1) to cause the holders of the floating rate notes to tender their notes at par at the next interest rate reset date, and (2) to transfer the fixed rate bond from the trusts to the fund, thereby collapsing the trusts. The fund accounts for the transfer of bonds to the trusts as secured borrowings, with the securities transferred remaining in the fund's investment assets, and the related floating rate notes reflected as fund liabilities under the caption "floating rate notes issued" in the statement of assets and liabilities. The balance of the floating rate notes issued as of February 28, 2017 was \$5,239,000. The average outstanding balance for the liability during the period ended February 28, 2017 was \$5,454,000 at a weighted average annual interest rate of 1.35%. The notes issued by the trusts have interest rates that reset weekly, and the floating rate note holders have the option to tender their notes to the trusts for redemption at par at each reset date.

Foreign Currency Contracts. Certain of the Funds may be subject to foreign currency exchange rate risk in the normal course of pursuing such Funds' investment objectives. The Funds may use foreign currency contracts to gain exposure to, or hedge against changes in the value of foreign currencies. Certain of the Funds enter into forward contracts to purchase and sell foreign currencies at a specified future date at a fixed exchange rate. Forward foreign currency contracts are valued at the forward rate, and are marked-to-market daily. The change in fair value is recorded by the Funds as an unrealized gain or loss. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

3. Operating Policies (Continued)

The use of forward foreign currency contracts does not eliminate the fluctuations in underlying prices of the Funds' portfolio securities, but it does establish a rate of exchange that can be achieved in the future. Although forward foreign currency contracts limit the risk of loss due to a decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Funds could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts or if the value of the currency changes unfavorably to the U.S. dollar.

Futures Contracts. The Funds are subject to equity price risk, interest rate risk, and foreign currency exchange rate risk in the normal course of pursuing their investment objectives. The Funds (with the exception of Real Estate Allocation Fund) may enter into futures contracts to hedge against changes in or to gain exposure to, change in the value of equities, interest rates and foreign currencies. Initial margin deposits are made by cash deposits or segregation of specific securities as may be required by the exchange on which the transaction was conducted. Pursuant to the contracts, a fund agrees to receive from or pay to the broker, an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as "variation margin" and are recorded by the fund as a variation margin receivable or payable on financial derivative instruments. Future contracts are marked to market daily at the closing settlement price or in the absence of such a price, the most recent quoted bid price. If there are no quotations available, the security is valued at the last available closing settlement price. During the period the futures contracts are open, daily changes in the fair value of the contracts are recognized as unrealized gains or losses. These unrealized gains or losses are included as a component of net unrealized appreciation (depreciation) of investments on the statements of assets and liabilities. When the contracts are closed, the fund recognizes a realized gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the fund's cost basis in the contract. There is minimal counterparty credit risk to the Funds because futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

Illiquid Securities. Illiquid securities generally cannot be sold or disposed of in the ordinary course of business (within seven calendar days) at approximately the value at which each of the Funds has valued the investments. This may have an adverse effect on each of the Funds' ability to dispose of particular illiquid securities at fair value and may limit each of the Funds' ability to obtain accurate market quotations for purposes of valuing the securities.

Indemnification. Under the Fund's by-laws, present and past officers, directors and employees are indemnified against certain liabilities arising out of the performance of their duties. In addition, in the normal course of business, the Fund may enter into a variety of contracts that may contain representations and warranties which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund.

Inflation-Indexed Bonds. Certain of the Funds may invest in inflation-indexed bonds. Inflation-indexed bonds are fixed-income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond, however, interest will be paid based on a principal value, which is adjusted for inflation. Any increase or decrease in the principal amount of an inflation-indexed bond will be included as interest income on the statements of operations, even though the Funds would not receive the principal until maturity.

Options Contracts. During the period Global Multi-Strategy Fund, Diversified Real Asset Fund, Multi-Manager Equity Long/Short Fund, and Preferred Securities Fund wrote call and put options on swaps, securities, indices and currencies they own or in which they may invest for both hedging and non-hedging purposes. Writing put options tends to increase a fund's exposure to the underlying instrument. Writing call options tends to decrease a fund's exposure to the underlying instrument. When a fund writes a call or put option, an amount equal to the premium received is recorded as a liability and subsequently marked to market to reflect the current value of the option written. These liabilities are reflected as options contracts written on the statements of assets and liabilities. Premiums received from writing options which expire are treated as realized gains. Premiums received from writing options which are exercised or closed are added to the proceeds or offset against amounts paid on the underlying swap, security, index or currency transaction to determine the realized gain or loss. A fund, as a writer of an option, has no control over whether the underlying swap, security, index or currency may be sold (call) or purchased (put) and as a result bears the market risk of an unfavorable change in the price of the swap, security, index or currency underlying the written option. There is the risk a fund may not be able to enter into a closing transaction because of an illiquid market. A fund may also purchase put and call options. Purchasing call options tends to increase a fund's exposure to the underlying instrument. Purchasing put options tends to decrease a fund's exposure to the underlying instrument. A fund pays a premium which is included on the fund's statements of assets and liabilities as an investment and subsequently marked to market to reflect the current value of the option. Premiums paid for purchasing options which expire are treated as realized losses. The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying swap, security, index or currency transaction to determine the realized gain or loss. Details of options contracts open at year end are included in the Funds' schedules of investments. Transactions in options written during the period ended February 28, 2017, were as follows:

Diversified Real Asset Fund	Number of Contracts	Notional Amount (thousands)	Premium (thousands)

3. Operating Policies (Continued)

Rebates. Subject to best execution, the Funds may direct certain portfolio transactions to brokerage firms that, in turn, have agreed to rebate a portion of the related brokerage commission to the Funds in cash. Commission rebates are included as a component of realized gain from investment transactions in the statements of operations.

Repurchase Agreements. The Funds may invest in repurchase agreements that are fully collateralized, typically by U.S. government or U.S. government agency securities. It is the Funds' policy that the counterparties' custodian takes possession of the underlying collateral securities. The fair value of the collateral is at all times at least equal to the total amount of the repurchase obligation. In the event of default on the obligation to repurchase, the Funds have the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. In the event the seller of a repurchase agreement defaults, the Funds could experience delays in the realization of the collateral.

In addition, Global Multi-Strategy Fund may enter into repurchase agreements with certain counterparties that are collateralized by assets other than U.S. government or U.S. government agency securities. The collateral pledged by the counterparty under these repurchase agreements is maintained in a segregated account at the counterparty's custodian. After entering into the repurchase agreement, the fund may sell short the security pledged by the counterparty as collateral in anticipation of a decline in market value. Upon the settlement of the short sale, the fund will unwind the repurchase agreement.

Although the repurchase agreements are typically open-ended through the maturity date of the collateral, the fund has a right to terminate the repurchase agreement at any time with two days' notice. During periods of high demand for the collateral security, the fund may also pay the counterparty a fee and the amount is recorded as interest expense on the statement of operations.

Global Master Repurchase Agreements govern the repurchase and reverse repurchase transactions between the fund and the counterparty. Collateral requirements for certain counterparties may be determined on a total exposure basis, rather than on an individual repurchase agreement or reverse repurchase agreement basis in order to determine the collateral to be received or pledged.

Restricted Securities. Certain of the Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult.

Reverse Repurchase Agreements. Global Multi-Strategy Fund has entered into reverse repurchase agreements. Under a reverse repurchase agreement, a fund sells securities and agrees to repurchase them at a specified date and price. Reverse repurchase agreements are considered to be borrowings by the fund, and are subject to the fund's restrictions on borrowing. Reverse repurchase agreements may increase the volatility of a fund and involve the risk that interest costs on money borrowed may exceed the return on securities purchased with the borrowed money. While a reverse repurchase agreement is outstanding, the Fund will maintain cash or appropriate liquid assets to cover its obligation under the agreement. The Fund will enter into reverse repurchase agreements only with parties that the Sub-Advisor deems creditworthy. The fund must segregate assets in an amount equal to the amount the fund owes pursuant to the terms of the reverse repurchase agreements. Reverse repurchase agreements are shown as a separate line item on the statements of assets and liabilities. Interest payments made are shown as reverse repurchase agreement interest expense on the statements of operations. The average amount of borrowings outstanding during the period ended February 28, 2017 was \$219,546,348 at a weighted average interest rate of 0.51%. The following table shows a breakdown of the obligations owed by fund, security type sold and remaining maturity for the reverse repurchase agreements.

Fund Security Type Remaining Contractual Tenor Repurchase Agreement
Global Multi Strategy Fund U.S. Treasury and Agency Securities Overnight and Continuous \$ 156,772
Global Multi Strategy Fund Foreign Corporate Bond Greater than 90 Days 4,403
Gross amount of recognized liabilities for reverse repurchase agreements \$ 161,175

3. Operating Policies (Continued)

Senior Floating Rate Interests. The Funds may invest in senior floating rate interests (bank loans). Senior floating rate interests hold the most senior position in the capital structure of a business entity (the "Borrower"), are typically secured by specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debtholders and stockholders of the Borrower. Senior floating rate interests are typically structured and administered by a financial institution that acts as the agent of the lenders participating in the senior floating rate interest. Senior floating rate interests are typically rated below-investment-grade, which means they are more likely to default than investment-grade loans. A default could lead to non-payment of income which would result in a reduction of income to the fund and there can be no assurance that the liquidation of any collateral would satisfy the Borrower's obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated.

Senior floating rate interests pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. These base lending rates are generally the prime rate offered by a designated U.S. bank or the London InterBank Offered Rate (LIBOR).

Senior floating rate interests generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for the Borrower to repay, prepayments of senior floating rate interests may occur. As a result, the actual remaining maturity of senior floating rate interests may be substantially less than stated maturities shown in the schedules of investments.

In connection with the senior floating rate interests, the Funds may also enter into unfunded loan commitments ("commitments"). All or a portion of the commitments may be unfunded. The Funds are obligated to fund these commitments at the borrower's discretion. Therefore, the Funds must have funds sufficient to cover its contractual obligation. Unfunded loan commitments are marked to market daily and the unrealized gain or loss is shown as a separate line item called unrealized gain or loss on unfunded loan commitments on the statements of assets and liabilities. As of February 28, 2017, the Funds had no unfunded loan commitments outstanding.

Short Sales. Bond Market Index Fund, Global Multi-Strategy Fund, and Multi-Manager Equity Long/Short Fund entered into short sales transactions during the period. A short sale is a transaction in which a fund sells a security it does not own as a hedge against some of its long positions and/or in anticipation of a decline in the market price of the security. The fund must borrow the security sold short and deliver it to the broker dealer which made the short sale. A security sold in a short sale transaction and the interest or dividend payable on the security if any, is reflected as a liability on the statement of assets and liabilities. The fund is obligated to pay any interest or dividends received on the borrowed securities. Interest accrued and dividends declared on short positions are recorded as an expense and appear as dividends and interest on shorts on the statement of operations. A fund is obligated to deliver the security at the market price at the time the short position is closed. Possible losses from short sales may be unlimited.

The fund is required to pledge cash or securities to the broker as collateral for securities sold short. Collateral requirements are calculated daily based on the current market value of the short positions. Cash deposited with the broker for collateral is included in deposits with counterparty on the statement of assets and liabilities and securities segregated as collateral are footnoted in the schedule of investments. The fund may pay broker's fees on the borrowed securities and may also pay a financing charge for the difference in the market value of the short position and cash collateral deposited with the broker. These fees are included as short sale fees on the statement of operations.

3. Operating Policies (Continued)

Swap Agreements. Diversified Real Asset Fund, Global Multi-Strategy Fund, and Multi-Manager Equity Long/Short Fund invested in swap agreements during the period. Swap agreements are privately negotiated agreements between a fund and a counterparty to exchange a series of cash flows at specified intervals based upon, or calculated by reference to, changes in specified prices or rates for a specified amount of an underlying asset. A fund may enter into credit default, currency, interest rate, or total return swap agreements to manage its exposure to credit, currency, interest rate, or market risk. In connection with these agreements, securities may be identified as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Swap agreements are valued through a pricing service or using procedures established and periodically reviewed by the Fund's Board of Directors; changes in value are recorded as unrealized gain or loss. These unrealized gains or losses are included as a component of net unrealized appreciation (depreciation) of investments on the statements of assets and liabilities.

Upon termination of swap agreements, the Funds recognize a realized gain or loss. Net periodic payments to be received or paid are accrued daily and are recorded in the statements of operations as realized gains or losses.

Payments received or made at the beginning of the measurement period are reflected as such on the statements of assets and liabilities and represent payments made or received upon entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, interest rates, and other relevant factors). These upfront payments are amortized daily over the term of the swap agreement as realized gains or losses on the statements of operations.

Notional principal amounts are used to express the extent of involvement in these agreements. Risks may exceed amounts shown on the statements of assets and liabilities. These risks include changes in the returns of the underlying instruments, unfavorable interest rate fluctuation, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of contractual terms in the agreements, and the possible lack of liquidity with respect to the swap agreements.

The Funds and any counterparty are required to maintain an agreement that requires the Funds and that counterparty to monitor the net fair value of all derivative transactions entered into pursuant to the contract between the Funds and such counterparty. If the net fair value of such derivatives transactions between the Funds and that counterparty exceeds a certain threshold (as defined in the agreement), the Funds or the counterparty are required to post cash and/or securities as collateral. Fair values of derivatives transactions presented in the financial statements are not netted with the fair values of other derivatives transactions or with any collateral amounts posted by the Funds or any counterparty.

Credit default swaps involve commitments to pay a fixed rate at a predetermined frequency in exchange for a lump sum payment if a "credit event", as defined in the agreement, affecting a third party occurs. Credit events may include a failure to pay interest, bankruptcy, restructuring, or other event as defined in the agreement. A "buyer" of credit protection agrees to pay a counterparty to assume the credit risk of an issuer upon the occurrence of a credit event. The "seller" of the protection receives periodic payments and agrees to assume the credit risk of an issuer upon the occurrence of a credit event. As the seller of credit protection, a Fund would add leverage to its portfolio because, in addition to its total net assets, a Fund would be subject to investment exposure on the notional amount of the swap.

If a fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If a Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, a Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

3. Operating Policies (Continued)

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. A Fund may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds with a credit default swap on indices which is less expensive than it would be to buy many credit default, and traders use them to speculate on changes in credit quality.

Credit default swap agreements on corporate issues or sovereign issues involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event). The Funds may use credit default swaps on corporate issues or sovereign issues of an emerging country to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Funds own or has exposure to the referenced obligation).

For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Wider credit spreads and increasing values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The maximum potential amount of future payments (undiscounted) that a Fund as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of February 28, 2017 for which a Fund is the seller of protection are disclosed in the footnotes to the schedules of investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by a Fund for the same referenced entity or entities.

Synthetic futures, which are total return swaps on futures contracts, along with equity basket swaps generally involve the commitment to receive positive returns or pay negative returns on a specified reference security, basket of securities, security index or index component without actually owning the underlying position.

Currency swap agreements involve the commitment to exchange cash flows on a notional amount based on changes in the relative values of the specified currencies.

Interest rate swaps involve the commitment to exchange cash flows based on changes in the value of a specific reference security or a basket of securities.

As of February 28, 2017, counterparties had pledged collateral for swap agreements of \$170,000 and \$1,476,250 for the Diversified Real Asset Fund and Global Multi-Strategy Fund, respectively. The collateral is maintained in a segregated account and is not recorded in the books and records of the funds. Certain collateral amounts relate to exchange cleared swaps which are not subject to master netting agreements with counterparties.

To Be Announced Securities. The Funds may trade portfolio securities on a "to-be-announced" ("TBA") or when-issued basis. In a TBA or when-issued transaction, the Funds commit to purchase or sell securities for which all specific information is not known at the time of the trade. Securities purchased on a TBA or when-issued basis are not settled until they are delivered to the Funds, normally 15 to 30 days later. These transactions are subject to market fluctuations and their current value is determined in the same manner as for other portfolio securities.

Underlying Funds. The performance and risks of Real Estate Allocation Fund, (singly, "a fund of funds") directly correspond to the performance and risks of the underlying funds in which the fund of funds invest. By investing in many underlying funds, the fund of funds have partial exposure to the risks of many different areas of the market. The more a fund of funds allocates to stock funds, the greater the expected risk.

An underlying fund to a fund of funds may experience relatively large redemptions or purchases as the fund of funds periodically reallocates or rebalances its assets. These transactions may accelerate the realization of taxable income if sales of portfolio securities result in gains and could increase transaction costs. In addition, when a fund of funds reallocates or redeems significant assets away from an underlying fund, the loss of assets to the underlying fund could result in increased expense ratios for that fund.

The Manager is the advisor to the Principal LifeTime Funds, Principal LifeTime Hybrid Funds, PVC Principal LifeTime Accounts, SAM Portfolios, PVC SAM Portfolios, PVC Diversified Balanced Account, PVC Diversified Balanced Managed Volatility Account, PVC Diversified Growth Account, PVC Diversified Income Account, Real Estate Allocation Fund, and each of the underlying funds. Principal Global Investors, LLC ("PGI") is Sub-Advisor to the Principal LifeTime Funds, Principal LifeTime Hybrid Funds, PVC Principal LifeTime Accounts, PVC Diversified Balanced Account, PVC Diversified Balanced Managed Volatility Account, PVC Diversified Growth Account, PVC Diversified Growth Managed Volatility Account, and PVC Diversified Income Account. Principal Real Estate Investors, LLC ("Principal-REI") is Sub-advisor to Real Estate Allocation Fund and Edge Asset Management, Inc. ("Edge") is the Sub-Advisor to the SAM Portfolios and PVC SAM Portfolios. PGI, Principal-REI, and Edge also serve as Sub-Advisors to some or all of the underlying funds. The Manager, PGI, Principal-REI, and Edge are committed to minimizing the potential impact of underlying fund risk on underlying funds to the extent consistent with pursuing the investment objectives of the fund of funds which it manages. Each may face conflicts of interest in fulfilling its responsibilities to all such funds.

As of February 28, 2017, the SAM Portfolios, Principal LifeTime Funds, Principal LifeTime Hybrid Funds, PVC SAM Portfolios, PVC Principal LifeTime Accounts, PVC Diversified Balanced Account, PVC Diversified Balanced Managed Volatility Account, PVC Diversified Growth Account, PVC Diversified Growth Managed Volatility Account, PVC Diversified Income Account, PVC Multi-Asset Income Account, and Real Estate Allocation Fund owned the following percentages, in the aggregate, of the outstanding shares of the underlying funds listed below:

<u>Fund</u>	Total Percentage of Outstanding Shares Owned
Blue Chip Fund	92.24%
Bond Market Index Fund	86.28
Diversified Real Asset Fund	24.74
EDGE MidCap Fund	99.62
Global Multi-Strategy Fund	49.54
Global Opportunities Fund	98.80
International Equity Index Fund	54.47
International Small Company Fund	99.54
Multi-Manager Equity Long/Short Fund	45.83
Origin Emerging Markets Fund	73.91
Preferred Securities Fund	4.25
Real Estate Debt Income Fund	98.49
Small-MidCap Dividend Income Fund	22.45

U.S. Government Agencies or Government-Sponsored Enterprises. Certain of the Funds may invest in U.S. Government agencies or government-sponsored enterprises. U.S. Government securities are obligations of, and in certain cases, guaranteed by, the U.S. Government or its agencies. The U.S. Government does not guarantee the net asset value of the Funds' shares. Some U.S. Government securities such as treasury bills, notes and bonds, and securities guaranteed by the Government National Mortgage Association ("GNMA") are supported by the full faith and credit of the U.S. Government. Other securities, such as those of the Federal Home Loan Bank are supported by the right of the issuer to borrow from the U.S. Department of the Treasury. Still other securities, such as those of the Federal National Mortgage Association ("FNMA") are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations.

Government related guarantors (those not backed by the full faith and credit of the United States Government) include FNMA and the Federal Home Loan Mortgage Corporation ("FHLMC"). FNMA is a government sponsored corporation, the common stock of which is owned entirely by private stockholders. FNMA purchases conventional residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks, credit unions, and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to the timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC issues Participation Certificates which are pass-through securities, each representing an undivided interest in a pool of residential mortgages. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but Participation Certificates are not backed by the full faith and credit of the U.S. Government.

Long equity futures contracts are used to obtain market exposure for the cash balances that are maintained by certain of the Funds and the notional values of the futures contracts will vary in accordance with changing cash balances. Long and short U.S. Treasury futures contracts are used to obtain interest rate exposure in order to manage duration of Diversified Real Asset Fund and Global Multi-Strategy Fund. The Preferred Securities Fund uses long and short U.S. Treasury futures contracts to mitigate interest rate volatility. The notional values of the futures contracts will vary in accordance with changing duration of these funds.

The following table includes a summary of the average quarterly outstanding volume by derivative instrument type for the period ended February 28, 2017:

4. Fair Valuation

Fair value is defined as the price that the Funds would receive upon selling a security in a timely transaction to an independent buyer in the principal or most advantageous market of the security at the measurement date. In determining fair value, the Funds use various valuation techniques, including market, income and/or cost approaches. A hierarchy for inputs is used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available.

Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Funds. Unobservable inputs are inputs that reflect the Funds own estimates about the estimates market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- •Level 1 Quoted prices are available in active markets for identical securities as of the reporting date. The type of securities included in Level 1 includes listed equities and listed derivatives.
- •Level 2 Other significant observable inputs (including quoted prices for similar investments, interest rates, prepayments speeds, credit risk, etc.). Investments which are generally included in this category include corporate bonds, senior floating rate interests, and municipal bonds.
- •Level 3 Significant unobservable inputs (including the Funds' assumptions in determining the fair value of investments). Investments which are generally included in this category include certain corporate bonds and certain mortgage backed securities.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the market place, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Funds in determining fair value is greatest for instruments categorized in Level 3.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Fair value is a market based measure considered from the perspective of a market participant who holds the asset rather than an entity specific measure. Therefore, even when market assumptions are not readily available, the Fund's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Funds use prices and inputs that are current as of the measurement date.

Investments which are generally included in the Level 3 category are primarily valued using quoted prices from brokers and dealers participating in the market for these investments. These investments are classified as Level 3 investments due to the lack of market transparency and market corroboration to support these quoted prices. Valuation models may be used as the pricing source for other investments classified as Level 3. Valuation models rely on one or more significant unobservable inputs such as prepayment rates, probability of default, or loss severity in the event of default. Significant increases in any of those inputs in isolation would result in a significantly lower fair value measurement. Benchmark pricing procedures set the base price of a security based on current market data. The base price may be a broker-dealer quote, transaction price, or internal value based on relevant market data.

The fair values of these entities are dependent on economic, political and other considerations. The values of the underlying investee entities may be affected by significant changes in the economic conditions, changes in government policies, and other factors (e.g., natural disasters, accidents, conflicts, etc.).

Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Fund's Board of Directors. The Manager has established a Valuation Committee of senior officers and employees, with the responsibility of overseeing the pricing and valuation of all securities, including securities where market quotations are not readily available. The Valuation Committee meets monthly and reports directly to the Board of Directors. The Pricing Group who reports to the Valuation Committee relies on the established Pricing Policies to determine fair valuation. Included in the Pricing Policies is an overview of the approved valuation technique established for each asset class. The Pricing Group will consider all appropriate information available when determining fair valuation.

The Pricing Group relies on externally provided valuation inputs to determine the value of Level 3 securities. Security values are updated as new information becomes available. Valuation data and changes in valuation amounts are reviewed on a daily basis based on specified criteria for the security, asset class, and other factors. In addition, valuation data is periodically compared to actual transactions executed by the Funds (i.e., purchases/sales) and differences between transaction prices and prior period valuation data are investigated based on specified tolerances.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those instruments.

The beginning of the period timing recognition has been adopted for the significant transfers between levels of each Fund's assets and liabilities. There were no significant purchases, sales, or transfers into or out of Level 3. The table below includes transfers from Level 1 to Level 2 at February 28, 2017 due to lack of exchange traded valuation data:

Diversified Real Asset Fund	\$ 7,498,853
Global Opportunities Equity Hedged Fund	42,172
Global Opportunities Fund	7,643,520
International Equity Index Fund	1,752,431
Origin Emerging Markets Fund	54,162,363
Preferred Securities Fund	101,374
SystematEx International Fund	11,962

In addition, the following amounts were transferred from Level 1 to Level 2 at February 28, 2017 to reflect events that occurred after the close of a certain foreign market or exchange but prior to the calculation of the net asset value:

Diversified Real Asset Fund	\$ 33,292,870
Global Opportunities Equity Hedged Fund	36,296
Global Opportunities Fund	7,385,598
Origin Emerging Markets Fund	27,679,199

Below are transfers from Level 2 to Level 1 at February 28, 2017 due to the resumption of trading for previous thinly traded securities:

Preferred Securities Fund \$ 10,998,161

The following is a summary of the inputs used as of February 28, 2017 in valuing the Funds' securities carried at value (amounts shown in thousands):

At the end of the period, there were no Funds which had a significant Level 3 balance. During the period, there were no significant purchases, sales, or transfers into or out of Level 3.

^{*} For additional detail regarding sector classifications, please see the Schedules of Investments.

** Exchange Cleared Swaps, Futures, Foreign Currency Contracts, and Synthetic Futures are valued at the unrealized appreciation/(depreciation) of the instrument.

5. Management Agreement and Transactions with Affiliates

Management Services. The Funds have agreed to pay investment advisory and management fees to the Manager (wholly owned by Principal Financial Services, Inc.) computed at an annual percentage rate of each of the Funds' average daily net assets. A portion of the management fee is paid by the Manager to the sub-advisor of each of the Funds, some of which are affiliates of the Manager. The annual rates used in this calculation for the Funds are as follows:

	Net Assets of Fund						
	First \$500 million	Next \$500 million	Next \$500 million	Over \$1.5 billion			
Blue Chip Fund	.70%	.68%	.66%	.65%			
Dynamic High Yield Explorer Fund	.65	.63	.61	.60			
EDGE MidCap Fund	.75	.73	.71	.70			
Global Opportunities Equity Hedged Fund	1.10	1.08	1.06	1.05			
Global Opportunities Fund	.85	.83	.81	.80			
International Small Company Fund	1.05	1.03	1.01	1.00			
Multi-Manager Equity Long/Short Fund	1.57	1.55	1.53	1.52			
Opportunistic Municipal Fund	.50	.48	.46	.45			
Origin Emerging Markets Fund	1.20	1.18	1.16	1.15			
Real Estate Debt Income Fund	.55	.53	.51	.50			
SystematEx International Fund	.60	.58	.56	.55			
SystematEx LargeCap Value Fund	.40	.38	.36	.35			

	Net Assets of Fund								
	First \$500 million	Next \$500 million	Next \$500 million	Next \$500 million	Next \$1 billion	Over \$3 billion			
Diversified Real Asset Fund	.85%	.83%	.81%	.80%	.79%	.78%			
Global Multi-Strategy Fund	1.60	1.58	1.56	1.55	1.54	1.53			
Preferred Securities Fund	.75	.73	.71	.70	.69	.68			
Small-MidCap Dividend Income Fund	.80	.78	.76	.75	.74	.73			

	All Net Assets
Bond Market Index Fund	.25%
International Equity Index Fund	.25
Real Estate Allocation Fund	.00

In addition to the management fee, R-1, R-2, R-3, R-4, and R-5 classes of shares of the Funds pay the Manager a service fee and an administrative service fee computed at an annual percentage rate of each class's average daily net assets. The annual rates for the service fee are .25%, .25%, .25%, .25%, and .25% and the annual rates for the administrative service fee are .28%, .20%, .07%, .03%, and .01% for R-1, R-2, R-3, R-4, and R-5, respectively. Class A, Class C, Class P and Institutional shares of the Funds reimburse Principal Shareholder Services, Inc. (the "Transfer Agent") (wholly owned by the Manager) for transfer agent services. Class J shares pays the Transfer Agent a fee for the services provided in an amount that includes a profit.

5. Management Agreement and Transactions with Affiliates (Continued)

The Manager has contractually agreed to limit the expenses (excluding interest expense, expenses related to fund investments, acquired fund fees and expenses, and other extraordinary expenses) for certain classes of shares of certain of the Funds. The reductions and reimbursements are in amounts that maintain total operating expenses at or below certain limits. The limits are expressed as a percentage of average daily net assets attributable to each class of shares on an annualized basis during the reporting period. The operating expense limits are as follows:

Period from September	1, 2016 through	February 28, 2017

^{^^} Period from January 4, 2017 to February 28, 2017.

5. Management Agreement and Transactions with Affiliates (Continued)

In addition, the Manager has contractually agreed to limit certain of the Funds' management and investment advisory fees. The expense limit will reduce the Fund's management and investment advisory fees by the following amounts:

		Expiration
Bond Market Index Fund	.03%	December 30, 2017
Global Multi-Strategy Fund	.04*	December 30, 2018

^{*} Period from December 31, 2016 to February 28, 2017.

In addition, the Manager has contractually agreed to limit Class P expenses other than management and investment advisory fees and distribution fees and, if necessary, pay expenses normally payable by the Funds, excluding interest expense, expenses related to fund investments, acquired fund fees and expenses, and other extraordinary expenses. The limits are expressed as a percentage of average daily net assets attributable to Class P shares on an annualized basis during the reporting period. The limits are as follows:

Period from September 1, 2016 through February 28, 2017

	Class P	Expiration
Blue Chip Fund	.20%	December 30, 2017
Diversified Real Asset Fund	.20	December 30, 2017
Global Multi-Strategy Fund	.20	December 30, 2017
Global Opportunities Equity Hedged Fund	.20	December 30, 2017
Global Opportunities Fund	.20	December 30, 2017
International Small Company Fund	.20	December 30, 2017
Multi-Manager Equity Long/Short Fund	.20	December 30, 2017
Opportunistic Municipal Fund	.20	December 30, 2017
Origin Emerging Markets Fund	.20	December 30, 2017
Preferred Securities Fund	.20	December 30, 2016
Real Estate Debt Income Fund	.20	December 30, 2017
Small-MidCap Dividend Income Fund	.20	December 30, 2016

Amounts owed to the Funds under the terms of the expense limitation agreements are reflected in the statement of assets and liabilities as expense reimbursement from Manager and are settled monthly.

Distribution Fees. The Class A, Class C, Class J, R-1, R-2, R-3, and R-4 shares of the Funds bear distribution fees. The fee is computed at an annual rate of the average daily net assets attributable to each class of each of the Funds. Distribution fees are paid to Principal Funds Distributor, Inc. ("the Distributor"), the principal distributor of the Funds. A portion of the distribution fees may be paid to other selling dealers for providing certain services. The annual rates are .25%, 1.00%, .15%, .35%, .30%, .25%, and .10% for Class A, Class C, Class J, R-1, R-2, R-3, and R-4 classes of shares, respectively.

The Distributor has voluntarily agreed to limit the distribution fees (expressed as a percent of average net assets on an annualized basis) attributable to Class J shares. The limit will maintain the level of distribution fees not to exceed .12% for Class J shares. The voluntary expense limit may be terminated at any time.

Amounts owed to the Funds under the terms of the expense limitation agreements are reflected in the statement of assets and liabilities as expense reimbursement from Distributor and are settled monthly.

5. Management Agreement and Transactions with Affiliates (Continued)

Sales Charges. The Distributor receives proceeds of any CDSC on certain Class A, Class C, and Class J share redemptions. The charge for Class A shares is 1.00% of the lesser of current market value or the cost of shares redeemed within 12 months of purchase that were originally sold without a sales charge. The charge for Class C shares is 1.00% of the lesser of current market value or the cost of shares redeemed within 12 months of purchase. The charge for Class J shares is 1.00% of the lesser of current market value or the cost of shares redeemed within 18 months of purchase. The Distributor also retains sales charges on sales of Class A shares based on declining rates which begin at 3.75% for Diversified Real Asset Fund, Dynamic High Yield Explorer Fund, Global Multi-Strategy Fund, Opportunistic Municipal Fund, Preferred Securities Fund, and Real Estate Debt Income Fund, and 5.50% for Blue Chip Fund, Global Opportunities Equity Hedged Fund, Global Opportunities Fund, International Small Company Fund, Multi-Manager Equity Long/Short Fund, Origin Emerging Markets Fund, Real Estate Allocation Fund, and Small-MidCap Dividend Income Fund. The aggregate amounts of these charges retained by the Distributor for the period ended

February 28, 2017, were as follows (amounts in thousands):

	Class A	Class C	Class J
Blue Chip Fund	\$ 78	\$ 3	N/A

^{*}Represents book-to-tax accounting differences related to straddle loss deferrals, constructive sale gain recognition, and defaulted securities.

[^] The Funds designate these distributions as exempt interest per IRC Sec. 852(b)(5).

^{*}The Funds designate these distributions as long-term capital gain dividends per IRC Sec. 852(b)(3)(C) in the 20-percent group (which may be taxed at a 20-percent rate, a 15-percent rate or a 0-percent rate, depending on the shareholder's taxable income).

7. Federal Tax Information (Continued)

Capital Loss Carryforwards. For federal income tax purposes, capital loss carryforwards are losses that can be used to offset future capital gains of the Funds. At August 31, 2016, the Funds had approximate net capital loss carryforwards as follows (amounts in thousands):

	\mathbf{E}	xpires in:	No Expir	ration:			
		2017	Short-Term I	ong-Term	Total	Li	Annual mitations*

^{*} In accordance with Sections 381-384 of the Internal Revenue Code, a portion of certain Fund's losses have been subjected to an annual limitation.

Capital losses generated in taxable years beginning after the enactment date of the Regulated Investment Company Modernization Act of 2010, December 22, 2010, will be carried forward with no expiration and with the character of the loss retained. These capital losses must be fully utilized before the pre-enactment capital loss carryforwards with expiration years listed in the table above.

As of August 31, 2016, the following funds utilized capital loss carryforwards as follows (amounts in thousands):

	<u>Utilized</u>
Bond Market Index Fund	\$ 1,805
Opportunistic Municipal Fund	425
Real Estate Debt Income Fund	1

Late-Year Losses. A regulated investment company may elect to treat any portion of any qualified late-year loss as arising on the first day of the next taxable year. Qualified late-year losses are certain capital and ordinary losses which occur during the portion of the Fund's taxable year subsequent to October 31 and December 31, respectively. At August 31, 2016 the following funds had approximate late-year losses as follows (amounts in thousands):

Blue Chip Fund	\$ 329
International Equity Index Fund	3,023
SystematEx International Fund	630
SystematEx Large Value Fund	11

7. Federal Tax Information (Continued)

Reclassification of Capital Accounts. The Funds may record reclassifications in their capital accounts. These reclassifications have no impact on the total net assets of the Funds. The reclassifications are a result of permanent differences between GAAP and tax accounting. Adjustments are made to reflect the impact these items have on current and future distributions to shareholders. Therefore, the source of the Funds' distributions may be shown in the accompanying Statement of Changes in Net Assets as from net investment income, from net realized gains on investments or from capital depending on the type of book and tax differences that exist. For the year ended August 31, 2016, the Funds recorded reclassifications as follows (amounts in thousands):

	Accumulated Undistributed Net <u>Investment Income</u>	Accumulated Net Realized Gain on Investments	Paid in Capital		
Blue Chip Fund	\$ (2)	\$ (4,266)	\$ 4,268

TOTAL NET ASSETS - 100.00%		\$ 4	,108,800

- (a) Non-Income Producing Security
- (b) Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Board of Directors. Certain inputs used in the valuation may be unobservable; however, each security is evaluated individually for purposes of ASC 820 which results in not all securities being identified as Level 3 of the fair value hierarchy. At the end of the period, the fair value of these securities totaled \$578 or 0.01% of net assets.
- (c) Security is Illiquid. At the end of the period, the value of these securities totaled \$40,855 or 0.99% of net assets.
- (d) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities totaled \$56,437 or 1.37% of net assets.
- (e) Variable Rate. Rate shown is in effect at February 28, 2017.

- (f) All or a portion of this security is owned by the DRA Cayman Corporation, which is a 100% owned subsidiary of the fund.
- (g) Rate shown is the discount rate of the original purchase.
- (h) Payment in kind; the issuer has the option of paying additional securities in lieu of cash.
- (i) This Senior Floating Rate Note will settle after February 28, 2017, at which time the interest rate will be determined.
- (j) Security or a portion of the security was pledged to cover margin requirements for futures contracts. At the end of the period, the value of these securities totaled \$30,060 or 0.73% of net assets.
- (k) Security or a portion of the security was pledged to cover margin requirements for swap and/or swaption contracts. At the end of the period, the value of these securities totaled \$1,153 or 0.03% of net assets.

Amounts in thousands

- (a) Implied credit spreads, represented in absolute terms, used in determining the market value of credit default swap agreements on corporate issues or sovereign issues as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.
- (b) The maximum potential payment amount that the seller of credit protection could be required to make if a credit event occurs as defined under the terms of that particular swap agreement is \$41,509 and 8,503 EUR.
- (c) The market price and resulting market value for credit default swap agreements on credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit default swap as of the period end. Increasing market values, in absolute terms, when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Other Assets and Liabilities	(0.09)%				
TOTAL NET ASSETS	100.00%				

- (a) Non-Income Producing Security
- (b) Security or a portion of the security was pledged to cover margin requirements for futures contracts. At the end of the period, the value of these securities totaled \$507 or 5.87% of net assets.
- (c) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities totaled \$48 or 0.69% of net assets.
- (d) Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Board of Directors. Inputs used in the valuation may be unobservable; however, not all securities are included in Level 3 of the fair value hierarchy. At the end of the period, the fair value of these securities totaled \$31 or 0.44% of net assets.

⁽b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities totaled \$10,202 or 0.79% of net assets.

⁽c) Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Board of Directors. Inputs used in the valuation may be unobservable; however, not all securities are included in Level 3 of the fair value hierarchy. At the end of the period, the fair value of these securities totaled \$5,673 or 0.44% of net assets.

(a) Non-Income Producing Security

Morgan Stanley Institutional Liquidity Funds -

Government Portfolio

(b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities totaled \$4,456 or 0.48% of net assets.

- (c) Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Board of Directors. Inputs used in the valuation may be unobservable; however, not all securities are included in Level 3 of the fair value hierarchy. At the end of the period, the fair value of these securities totaled \$0 or 0.00% of net assets.
- (d) Variable Rate. Rate shown is in effect at February 28, 2017.

- (a) Security or a portion of the security was pledged as collateral for short sales. At the end of the period, the value of these securities totaled \$103,852 or 32.05% of net assets.
- (b) Non-Income Producing Security
- (c) Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Board of Directors. Inputs used in the valuation may be unobservable; however, not all securities are included in Level 3 of the fair value hierarchy. At the end of the period, the fair value of these securities totaled \$12,639 or 3.90% of net assets.
- (d) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities totaled \$2,046 or 0.63% of net assets.
- (e) Security or a portion of the security was pledged to cover margin requirements for swap and/or swaption contracts. At the end of the period, the value of these securities totaled \$10,954 or 3.38% of net assets.

 Fair value of these investments is determined in good faith by the Manager under procedures established and periodically reviewed by the Board of Directors. Inputs used in the valuation may be unobservable; however, not all securities are included in Level 3 of the fair value hierarchy. At the end of the period, the fair value of these securities totaled \$17,995 or 2.80% of net assets.

- (a) Perpetual security. Perpetual securities pay an indefinite stream of interest, but they may be called by the issuer at an earlier date.
- (b) Variable Rate. Rate shown is in effect at February 28, 2017.
 (c) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At the end of the period, the value of these securities totaled \$1,299,758 or 23.61% of net
- assets.
 (d) Non-Income Producing Security
- (e) Affiliated Security as defined by the Investment Company Act of 1940 (the fund controls 5.0% or more of the outstanding voting shares of the security). Please see Affiliated Sub-Schedule for transactional information.

⁽a) Calculated based on average shares outstanding during the period.

⁽b) Six months ended February 28, 2017.

⁽c) Total return amounts have not been annualized.

⁽d) Total return is calculated without the contingent deferred sales charge.

⁽e) Computed on an annualized basis.

⁽f) Excludes expense reimbursement from Manager and/or Distributor.

⁽g) Excludes expense reimbursement from Manager.

⁽h) During 2014, the Class experienced a significant withdrawal of monies by an affiliate. As the remaining shareholders held relatively small positions, the total return amounts expressed herein are greater than those that would have been experienced without the withdrawal.

⁽i) Total return is calculated using the traded net asset value which may differ from the reported net asset value. The traded net asset value is the net asset value which a shareholder would have paid or received from a subscription or redemption.

⁽a) Calculated based on average shares outstanding during the period.

⁽b) Six months ended February 28, 2017.

⁽c) Total return amounts have not been annualized.

⁽d) Computed on an annualized basis.

⁽e) Does not include expenses of the investment companies in which the Fund invests.

⁽f) Excludes expense reimbursement from Manager.

⁽g) Period from December 31, 2014, date operations commenced, through August 31, 2015.

⁽h) Total return is calculated using the traded net asset value which may differ from the reported net asset value. The traded net asset value is the net asset value which a shareholder would have paid or received from a subscription or redemption.

⁽i) Period from January 3, 2017, date operations commenced, through February 28, 2017. (j) Period from September 22, 2015, date operations commenced, through August 31, 2016.

SHAREHOLDER EXPENSE EXAMPLE PRINCIPAL FUNDS, INC. February 28, 2017(unaudited)

As a shareholder of Principal Funds, Inc., you incur two types of costs: (1) transaction costs (for Class J shares only), including contingent deferred sales charges; and (2) ongoing costs, including management fees; distribution fees (for certain share classes); and other fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in Principal Funds, Inc. and to compare these costs with the ongoing costs of investing in other mutual funds. As a shareholder of Real Estate Allocation Fund, the fund will indirectly bear its pro rata share of expenses incurred by the investment companies in which the fund invests. These expenses are not included in the fund's annualized expense ratio used to calculate the expenses paid in this example. If they were, the expenses would be higher.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (September 1, 2016 to February 28, 2017), unless otherwise noted.

Actual Expenses

The first section of the table below provides information about actual account values and actual expenses. You may use the information in this section, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first section under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. R-1, R-2, R-3, R-4, and R-5 classes of shares may be purchased only through retirement plans. Such plans may impose fees in addition to those charged by the fund. These fees are not included in the table below. If they were, the estimate of expenses you paid during the period would be higher, and your ending account value lower, by this amount.

Hypothetical Example for Comparison Purposes

The second section of the table below provides information about hypothetical account values and hypothetical expenses based on each fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in Principal Funds, Inc. and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as contingent deferred sales charges, redemption fees or exchange fees. Therefore, the second section of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

⁽a) Expenses are equal to a fund's annualized expense ratio multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one-half year

period).

(b) Expenses are equal to a fund's annualized expense ratio multiplied by the average account value over the period (January 3, 2017 to February 28, 2017), multiplied by 56/365 (to reflect the period since inception).

FUND DIRECTORS AND OFFICERS

Under Maryland law, a Board of Directors oversees the Fund. The Directors have financial or other relevant experience and meet several times during the year to review contracts, Fund activities and the quality of services provided to the Fund. Each director also has the same position with Principal Variable Contracts Funds, Inc. and Principal Exchange-Traded Funds which are also sponsored by Principal Life Insurance Company. Each director holds office for an indefinite term or until reaching age 72. Directors considered to be "interested persons" as defined in the Investment Company Act of 1940, as shown below are considered to be interested because of an affiliation with the Manager and Principal Life Insurance Company.

The following directors are considered not to be "interested persons" as defined in the 1940 Act

Name, Position Held with the Fund, Year of Birth Elizabeth Ballantine Director since 2004 Member, Nominating and Governance Committee 1948	Principal Occupation(s) <u>During past 5 years</u> Principal, EBA Associates	Number of Portfolios in Fund Complex Overseen by Director 126	Other Directorships Held by Director During Past 5 Years Durango Herald, Inc; McClatchy Newspapers, Inc.
Leroy T. Barnes, Jr. Director since March 2012 Member, Audit Committee 1951	Retired.	126	McClatchy Newspapers, Inc.; Herbalife Ltd.; Frontier Communications, Inc.
Craig Damos Director since 2008 Member, Audit Committee Member, 15(c) Committee 1954	President, The Damos Company	126	Hardin Construction Company
Mark A. Grimmett Director since 2004 Member, Nominating and Governance Committee Member, 15(c) Committee Member, Executive Committee 1960	Formerly, Executive Vice President and CFO, Merle Norman Cosmetics, Inc.	126	None
Fritz S. Hirsch Director since 2005 Member, Operations Committee Member, 15(c) Committee 1951	CEO, MAM USA	126	Focus Products Group
Tao Huang Director since March 2012 Member, Operations Committee Member, 15(c) Committee 1962	Formerly, Chief Operating Officer, Morningstar, Inc.	126	Armstrong World Industries, Inc.

The 15(c) Committee assists the Board in performing the annual review of the Fund's advisory and sub-advisory agreements pursuant to Section 15(c) of the 1940 Act.

The Audit Committee selects the independent auditors for the Fund and oversees the activities of the independent auditors as well as the internal auditors. The committee also receives reports about accounting and financial matters affecting the Fund.

The Executive Committee is selected by the Board. It may exercise all the powers of the Board, with certain exceptions, when the Board is not in session. The Committee must report its actions to the Board.

The Nominating and Governance Committee selects and nominates all candidates who are not "interested persons" of the Fund for election to the Board. The committee also oversees the structure and efficiency of the Board of Directors and the committees the Board establishes.

The Operations Committee oversees the provision of administrative and distribution services to the Funds, communications with the Funds' shareholders, and provides review and oversight of the Funds' operations.

Additional information about the Fund is available in the Prospectus dated December 31, 2016, and the Statement of Additional Information dated December 31, 2016. These documents may be obtained free of charge by writing Principal Funds, Inc., P.O. Box 8024, Boston, MA 02266-8024 or telephoning 1-800-222-5852. The prospectus may be viewed at www.PrincipalFunds.com/prospectuses.

PROXY VOTING POLICIES

A description of the policies and procedures the Fund uses to determine how to vote proxies relating to portfolio securities and the results of the proxy votes for the most recent twelve months ended June 30 may be obtained free of charge by telephoning 1-800-222-5852, or on the SEC website at www.sec.gov.

SCHEDULES OF INVESTMENTS

The Fund files complete schedules of investments with the Securities and Exchange Commission as of May 31 and November 30 of each year on Form N-Q. The Fund's Form N-Q can be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. or on the Commission's website at www.sec.gov. Information on the operation of the Public Reference Room may be obtained by calling the Commission at 1-202-551-8090.

BOARD CONSIDERATION OF INVESTMENT ADVISORY CONTRACTS

During the period covered by this report, the Board of Directors of Principal Funds, Inc. ("PFI") approved (1) the annual review and renewal of the Management Agreement and various subadvisory agreements for all Funds; and (2) a Subadvisory Agreement with Ascend Capital LLC related to the Global Multi-Strategy Fund.

Annual Review and Renewal of Management Agreement and Subadvisory Agreements

At its September 13, 2016 meeting, the Board performed its annual review and renewal process relating to the Management Agreement and the Subadvisory Agreements relating to the Management Agreement and the Subadvisory Agreements of twenty series of PFI having a fiscal year end of 8/31 (each series is referred to as a "Fund").

Section 15(c) of the Investment Company Act of 1940 (the "1940 Act") requires the Board, including a majority of the Directors who have no direct or indirect interest in the investment advisory agreements and who are not "interested persons" of PFI, as defined in the 1940 Act (the "Board"), to annually review and consider the continuation of: (1) the Management Agreement between the Manager and PFI, on behalf the Funds (2) the Subadvisory Agreements between the Manager and each of AQR Capital Management, LLC /CNH Partners, LLC; Ascend Capital, LLC; BlackRock Financial Management, Inc.; Brookfield Investment Management Inc.; Credit Suisse Asset Management, LLC; Edge Asset Management, Inc.; Finisterre Capital LLP; Fischer Francis Trees & Watts, Inc.; Gotham Asset Management, LLC; Graham Capital Management, L.P.; KLS Diversified Asset Management LP; Loomis, Sayles & Company, L.P.; Los Angeles Capital Management and Equity Research, Inc.; Macquarie Capital Investment Management LLC; Mellon Capital Management Corporation; Origin Asset Management LP; Passport Capital, LLC; Pictet Asset Management SA; PGI; Principal Real Estate Investors, LLC; Sirios Capital Management, L.P.; Sound Point Capital Management, LP; Spectrum Asset Management, Inc.; Symphony Asset Management LLC; Three Bridges Capital, LP; Tortoise Capital Advisors, LLC; Wellington Management Company LLP; and York Registered Holdings, L.P. The Management Agreement and the Subadvisory Agreements are collectively referred to as the "Advisory Agreements."

The Board, including the Independent Directors, considered the factors and reached the conclusions described below relating to the continuation of the Advisory Agreements. In evaluating the Advisory Agreements, the Board, including the Independent Directors, reviewed a broad range of information requested for this purpose by the Independent Directors, including, among other information, information regarding performance, advisory fees, total expenses, profitability from the Advisory Agreements to the Manager and information about economies of scale. The Board reviewed the materials provided and concluded that it was provided all information reasonably necessary to evaluate the Advisory Agreements.

Nature, Extent and Quality of Services

The Board considered the nature, quality and extent of the services provided under the Management Agreements, including administrative services. The Board considered the experience and skills of senior management leading Fund operations, the experience and skills of the personnel performing the functions under the Management Agreement and the resources made available to such personnel, the ability of the Manager to attract and retain high-quality personnel and the organizational depth and stability of the Manager. The Board concluded that appropriate resources were provided under the Management Agreement. The Board also considered that, during the periods reviewed, other than for the "Core" portions of the Funds implementing the "Core Satellite" structure, the Manager had delegated day-to-day portfolio management responsibility to the Subadvisors. The Board noted that the Manager's process emphasizes the selection of Principal-affiliated subadvisors that are determined to be qualified under the Manager's due diligence process, but that the Manager will select an unaffiliated subadvisor to manage all of a portion of a Fund's portfolio when deemed necessary or appropriate based on a consideration of the Fund's investment mandate and available expertise and resources within the Principal organization. With respect to Funds with unaffiliated Subadvisors, the Board considered the due diligence process developed by the Manager for purposes of selecting a highly qualified unaffiliated subadvisor for a Fund and for monitoring and replacing unaffiliated Subadvisors. The Board concluded that this due diligence process was working well. The Board also considered the compliance program established by the Manager and the level of compliance attained by the Funds. The Board noted that they had previously reviewed the annual best execution and soft dollar reports and included those findings in their consideration of the renewal of the Advisory Agreements. Based upon all relevant factors, the Board concluded that the nature, quality and extent of the services provided by the Manager to the Funds under the Management Agreement were satisfactory.

The Board considered the nature, quality and extent of services provided under each Subadvisory Agreement. The Board considered the reputation, qualifications and background of the Subadvisor, investment approach of the Subadvisor, the experience and skills of investment personnel responsible for the day-to-day management of each Fund, and the resources made available to such personnel. The Board also considered the Subadvisors' compliance with investment policies and general legal compliance. Based upon all relevant factors, the Board concluded that the nature, quality and extent of the services provided by the Subadvisors to the Funds under the Subadvisory Agreements are satisfactory.

Investment Performance

The Board reviewed each Fund's investment performance over longer-term periods, reviewing both the investment return during the three-year period ended March 31, 2016 and the blended investment return (50%/50%) of the three- and five-year periods ended March 31, 2016, and compared those returns to various agreed-upon performance measures, including peer-group data based upon a broad-based, industry category determined by Morningstar. For Funds or Subadvisors that did not have a three-year or five-year performance history, the Board reviewed performance for a one-year or three-year period, respectively, if available. The Board also compared each Fund's investment performance over the three-year period ended March 31, 2016 to one or more relevant benchmark indices. For Funds that did not have a three-year performance history, the Board compared the Fund's performance over the one-year period ended March 31, 2016 to one or more relevant benchmark indices. The Board noted that certain Funds had commenced operations recently and, accordingly, no performance information was considered.

The Board also considered whether investment results were consistent with a Fund's investment objective(s) and policies. For most Funds, the Board concluded that the Fund's investment returns met acceptable levels of investment performance. There were certain Funds, and certain Subadvisors for multi-manager Funds that had not attained during the relevant period a level of investment performance considered satisfactory by the Board. For such Funds, the Board also considered other factors, such as the longer-term performance of each such Fund. The Board considered the Manager's due diligence process for evaluating performance applied to all Funds and all Subadvisors, for which they received regular reporting, and concluded that the Manager has in place an effective due diligence process to monitor investment performance, to encourage remedial action and to make changes in the Subadvisors at the appropriate time, if necessary.

Investment Management Fees

The Board considered each Fund's management fee. The Board received information, based on data supplied by Broadridge, comparing each Fund's (1) contractual management fee at current asset levels and at theoretical asset levels, (2) actual (after any fee waivers) management fee at average fiscal-year asset levels, (3) actual non-management fees at average fiscal-year asset levels, and (4) actual total expense ratio (including, as applicable, acquired fund fees and expenses) at average fiscal-year asset levels for Class A shares, where available, to advisory fees and expense ratios of mutual funds in a peer group selected by Broadridge, or for one Fund, a custom peer group recommended by the Manager and reviewed by the Board ("Expense Group") and a broad-based, industry category defined by Broadridge ("Expense Universe"). For Funds that did not offer Class A shares or if Class A shares represented less than 5% of the Fund's total assets, the information provided was based upon Institutional Class shares (or in the case of one Fund, Class R-6 shares).

In evaluating the management fees, the Board considered a variety of factors, including the amount of the fees, breakpoints, comparison to fees of peer group funds as well as other funds managed by the Manager, subadvisory fees paid, services provided, investment performance, total net expense ratios, profitability and expense caps and fee waivers. For most Funds, actual management fees were within the third quartile or better when compared to their Expense Group. For some Funds, although actual management fees were higher than the third quartile, total net expense ratios were within the third quartile or better.

Considering all factors they deemed relevant, the Board concluded that the management fee schedule for each Fund was reasonable and appropriate in light of the nature, quality and extent of the services provided by the Manager and other relevant factors.

Profitability

The Board reviewed detailed information regarding revenues the Manager receives under the Management Agreement, as well as the estimated direct and indirect costs the Manager incurs in providing to each Fund the services described in the applicable Advisory Agreements, for the year ended December 31, 2015. The Board also considered the returns on revenue generated in connection with the payment of subadvisory fees to affiliated Subadvisors (Principal Global Investors, LLC, Principal Real Estate Investors LLC, Columbus Circle Investors, Edge Asset Management Inc., Finisterre Capital LLP, Origin Asset Management LLP and Spectrum Asset Management, Inc.), and the aggregated return on revenue to the Manager and its affiliates. The Board concluded that the management fee for each Fund was reasonable, taking into account the profitability information presented by the Manager.

Economies of Scale

The Board considered whether there are economies of scale with respect to the management of each Fund and whether the Funds benefit from any such economies of scale. The Board then reviewed the levels at which breakpoints occur and the amount of the reductions. The Board considered whether the effective management fee rate for each Fund under the applicable Management Agreement is reasonable in relation to the asset size of such Fund. The Board also noted management's explanation of efficiencies in the Manager's cost structure and the impact on the Manager's profitability. The Board concluded that the fee schedule for each Fund reflects an appropriate level of sharing of any economies of scale.

The Board noted that the management fees for Bond Market Index and International Equity Index, do not include breakpoints. Although their management fee schedules do not include breakpoints, the Board noted that each of these Funds has a relatively low basis point fee on all Fund assets.

Subadvisory Fees, Economies of Scale and Profitability

For each Fund, the Board considered the subadvisory fees, noting that the Manager compensates each Subadvisor from its own management fee, so that shareholders pay only the management fee. The Board also received industry data supplied by Broadridge. The Board considered whether there are economies of scale with respect to the subadvisory services provided to each Fund and, if so, whether the subadvisory fees reflect such economies of scale through breakpoints in fees. In addition, in evaluating the subadvisory fees and the factor of profitability, with respect to unaffiliated Subadvisors, the Board considered that the subadvisory fee rate was negotiated at arm's-length between the Manager and each Subadvisor. The Board considered the profitability of the affiliated Subadvisors in conjunction with their review of the profitability of the Manager. On the basis of the information provided, the Board concluded that the subadvisory fees were reasonable.

Other Benefits to the Manager and Subadvisors

The Board also considered the character and amount of other incidental benefits received by the Manager and its affiliates and each Subadvisor from their relationships with the Funds. The Board also considered as a part of this analysis each Subadvisor's soft dollar practices and brokerage practices. The Board concluded that management and subadvisory fees for each Fund were reasonable in light of these benefits.

Overall Conclusions

Based upon all of the information it considered and the conclusions it reached, the Board determined unanimously that the terms of each Advisory Agreement continue to be fair and reasonable and that the continuation of each Advisory Agreement, with the actions proposed by the Manager, is in the best interests of each Fund.

Ascend Capital, LLC Subadvisory Agreement

On September 13, 2016, the Board considered for the Global Multi-Strategy Fund (the "Fund") the approval of a sub-advisory agreement (the "Subadvisory Agreement") between the Manager and Ascend Capital, LLC (the "Subadvisor") with respect to the equity long/short investment sleeve of the Fund.

The Board concluded that it was in the best interests of the Fund to approve the Subadvisory Agreement. In reaching this conclusion, no single factor was determinative in the Board's analysis, but rather the Board considered a variety of factors. The Board considered various factors, including the following, and made certain findings and conclusions with regard thereto, in approving the Subadvisory Agreement.

Nature, Quality and Extent of Services

The Board considered the nature, quality and extent of the services expected to be provided under the Subadvisory Agreement. The Board considered the reputation, qualifications and background of the Subadvisor, the investment approach of the Subadvisor, the experience and skills of the Subadvisor's investment personnel who would be responsible for the day-to-day management of the Fund, and the resources made available to such personnel. In addition, the Board considered the Manager's program for recommending, monitoring and replacing Subadvisors and that the Manager recommended the Subadvisor based upon that program.

Investment Performance

The Board reviewed the back-tested one-year and since-inception (May 1, 2014) performance returns as of June 30, 2016 (gross and net of proposed fees) of the Subadvisor in an investment strategy similar to the proposed strategy for the equity long/short investment sleeve of the Fund (which included historical performance returns of the Subadvisor in a composite with an investment strategy similar to the proposed strategy for the equity long/short investment sleeve of the Fund for the period May 1, 2014 through April 30, 2016), as compared to the historical performance returns (gross and net of fees) of the two current and continuing Subadvisors to the investment sleeve of the Fund and to two relevant benchmark indices, and the historical performance returns (gross and net of fees) of the two current and continuing Subadvisors to the investment sleeve of the Fund and to the two relevant benchmark indices. The Board also reviewed the percentile rankings of the performance of the Subadvisor's composite (net of proposed fees) and the performance of the two current and continuing Subadvisors to the investment sleeve of the Fund (net of fees) in a relevant Morningstar category for each of the periods and the year referenced above. The Board concluded, based upon the information provided, that the Subadvisor is well qualified.

Fees, Economies of Scale and Profitability

The Board considered the proposed subadvisory fee, noting that the Manager compensates Subadvisors from its own management fee so that shareholders pay only the management fee. The Board considered whether there are economies of scale with respect to the subadvisory services to be provided to the Fund under the Subadvisory Agreement. The Board concluded that, although the proposed subadvisory fee schedule does not include breakpoints, the Subadvisor's fee schedule is appropriate at currently anticipated asset levels. The Board considered the Manager's statement that it found the proposed subadvisory fee schedule to be competitive. On the basis of the information provided, the Board concluded that the proposed subadvisory fee was reasonable.

Other Benefits

The Board also considered the character and amount of other incidental benefits to be received by the Subadvisor. The Board noted that the Subadvisor intends to use soft dollars and that the Subadvisor's policy is to use soft dollars within the Section 28(e) safe harbor. The Board concluded that, on the basis of the information provided, the proposed subadvisory fee was reasonable.

Overall Conclusions

Based upon all of the information considered and the conclusions reached, the Board determined that the terms of the Subadvisory Agreement are fair and reasonable and that approval of the Subadvisory Agreement is in the best interests of the Fund.
